Football Double Chance

A very popular way of betting on football is the Double Chance. The Double Chance is when you can bet on two different results on a game. You may wish to bet on a draw and a win on the same match.

Minimise the risk while you wager. You will be getting reduced odds but your chances of winning are improved.

Example

Barcelona are playing at home against Liverpool in the Champions League. You decide to place a Double Chance bet on Barcelona (1X). You will win if Barcelona wins or draw. It is also possible to bet on one of the two teams to win with Double Chance betting (12). You will lose your bet if the match ends in a draw.
